cable set for 88 keys hammer keyboard (2x30cm, 20 pins)	20,00

All prices are in Euro and include the German sales tax (19% VAT). Shipping charges are not included. All prices are without after touch and unweighted keys unless otherwise specified (or if the keybeds are available only with weighted keys from Fatar). For details please refer to the Fatar website (www.fatar.com).

All articles marked **black bold** are standard products that are usually in stock. All articles marked *grey italic* are custom orders. In these cases the delivery time is about 8-12 weeks (depending upon the current delivery situation). Articles not shown in this list are not available.

Pay attention that it is not possible to return specially ordered keyboards because they are custom made cannot be returned to Fatar (especially the German "Fernabsatzgesetz" is not valid). We have to point out that there will be not the usual service from us in the future for these keyboards (e.g. no spare parts like keys, springs, contacts, weights) as we do not have these keyboards as regular products available ! You have to count on long delivery times for spare parts for these products as even the spare parts are custom orders. We only offer to order the keyboards for you as Fatar does not sell to end users. We also expect a down payment of at least 50% in advance as the keybeds are especially ordered for you. The balance has to be paid just before the shipment to you (i.e. as soon as we receive the goods from Fatar).

We ask for your understanding that we are not able to offer consultation and service for keyboards we do not use in our products (e.g. feeling, measures, weight, schematics) as we only know the specifications that are available at the manufacturers website. We just offer the service to order the keybeds for you because Fatar does not deliver to end customers. Not all types of keyboards shown on the Fatar website are always available but only if they are currently in production or in stock. The minimum delivery time is about 8-12 weeks as we normally add these special orders to regular keyboard consignments to keep the additional shipment charges as low as possible.

Please contact our sales office (sales@doepfer.de) or the Doepfer representative in your country if you want to order (www.doepfer.com > dealers). We also expect a down payment of at least 50%.

Technical details about the keybeds and bass pedals listed above are available at the Fatar website www.fatar.com. We do not have other information available than those from the Fatar website as we do not use these keybeds in our own products (only the **black bold** marked keybeds or bass pedals are used in our own products).
