DOEPFER MUSIKELEKTRONIK

SoundDiver Adaptions and Libraries for Doepfer-Devices

The SoundDiver-Adpations/Libraries are freeware and not included with the shipment.
Doepfer does not warrant that the software is error free. Doepfer disclaims all other warranties with respect to the software, either express or implied, including but not limited to implied warranties of merchantability, quality, fitness for a particular purpose and non infringement of third party rights. In no event shall Doepfer or its suppliers be liable for any consequential, special, incidental or indirect damages of any kind arising out of the delivery, performance or usage of the software, even if Doepfer has been advised of the possibility of such damages.
Due to the fullness of data we cannot guarantee that all informations are faultless. If you find any error or if you have any suggestion for improvement don't hesitate to contact us (e.g. you could send an email to software@doepfer.de).
The Adaptions / Libraries are subject to change.

The SoundDiver OEM version is NOT freeware. Therefore we cannot public the program on the internet! (1)
The program (a version for windows PC and a version for MAC) is now only available on a support CD we offer.
If you order a Drehbank oder SK2000 the CD is including. (1)
For other low-cost devices (f.e. pocketControl, pocketDial) you have to pay an extra working fee for the CD.
Please take into account the extra charge for orders < Euro 25.- if you order only the CD.
Contact your local dealer or sales@doepfer.de for details.

(1) It's planned for July 2002 to implement the ability to get the program from a user and password protected download path after a official registration.

Important for **Mac-Users** - please read this statement .

The ADA/LIB Files were made on a Win PC. So if you want to use them on a Mac computer you have to alter the Type and Creator of the file coming from the PC.
For that, please read   convert.pdf (english) or konvert.pdf (deutsch).

We also offer all files in the STUFF-format for Mac Users. All files with the ending SIT. Before you can use this files please 'unstuff' it.

Then you have to put the files in the right pathes of your SoundDiver folder:
the adpations (ADA) in a folder **Diver** (2)
the libraries (LIB) in a folder **Libraries** (2)

On the CD you will find all the ADA,LIB,ADA.SIT,ADA.LIB files in the folder **'sdiver'**

there are one folder for **windows** and one for **mac**

here are the subfolders

diver for ADA / ADA.SIT
libraries for LIB / LIB.SIT

(2) If this folder doesn't exist in your SoundDiver folder you had to create it!

(3) Please do not use the links form adaption name / library name as a direct link to donwload the file. If you doubleclick f.e. direct on DREHBANK.ADA your browser will try to open this file direct, which is normally not the thing you want.
If you want to download the file to your computer (we assume that is the thing you want) f.e. for MS Explorer you had to click on the link f.e. DREHBANK.ADA and then store the file (with your right mouse button and the right context menu) to your computer!
